# TEDOM TAFOTSI DIMITRI WILFRIED

## DEV FULL-STACK

**Address:** Yaounde, Cameroon
**Phone:** +237 695 760 594 / +237 672 953 372
**Email:** dimitritedom@gmail.com
**Portfolio:** www.dimitri-snowdev.me/
**GitHub:** github.com/DimitriTedom
**LinkedIn:** in/tedom-tafotsi-dimitri-wilfried

## PROFESSIONAL SUMMARY

Full-stack JavaScript/TypeScript developer with hands-on experience designing, building, and deploying modern web platforms for businesses and communities in Cameroon. Strong focus on responsive UI, maintainable code, and production-ready architecture using the React/Next.js ecosystem. Comfortable owning projects end-to-end, from requirements and interface design to development, deployment, and support.

## CORE COMPETENCIES

- Full-stack web development (React, Next.js, Node.js, TypeScript)
- Responsive design and UI implementation with Tailwind CSS and shadcn/ui
- Bilingual platform implementation (French/English UX and content)
- API integration, form workflows, and automated email notifications
- Production deployment, testing workflows, and iterative improvement

## EXPERIENCE

### Freelance Full-Stack Web Developer — Self-Employed

*Feb 2025 – Present* → *linkedin.com/in/tedom-tafotsi-dimitri-wilfried* *www.upwork.com/freelancers/~010e493a28561cd5ce*

- Design, build, and deploy responsive websites and web applications for client needs across portfolio, business, and product use cases.
- Delivered a complete front-end portfolio project within 48 hours, including responsive layouts, animations, and contact workflow integration.
- Built MVP web products using React, TypeScript, Tailwind CSS, shadcn/ui, Framer Motion, EmailJS, and Zod.
- Collaborate with clients from concept to launch, translating business goals into clear technical deliverables.

### Full-Stack Web Developer — Master Language & Technology Institute

*Apr 2025 – Present*

- Develop and maintain digital platforms (websites and web app features) aligned with customer and business requirements.
- Contribute to digital communication by preparing social media content and improving online visibility.
- Support project planning and execution through documentation and delivery coordination.
- Bridge technical and communication workflows to support consistent digital branding and engagement.

## RECENT PROJECT HIGHLIGHT

### GRICOLI SARL — Full-Stack Web Platform

Live project Github

*Next.js14,TypeScript,Supabase,Prisma,TailwindCSS,i18next,Nodemailer, Vercel*

- Built and structured a bilingual (French/English) company platform for GRICOLI SARL, including public pages, blog, careers portal, and protected admin dashboard.
- Implemented core product features such as contact and newsletter workflows, job applications, blog management, and multilingual routing.
- Integrated production-focused capabilities: SEO metadata (Open Graph, JSON-LD, sitemap), PWA support, automated email notifications, and testing pipelines (Vitest + Playwright).
- Contributed to a scalable and maintainable architecture with clear documentation and deployment-ready workflows.

## SELECTED PROJECTS

**MERN E-Commerce Application — Full-Stack Product** **Live project** **Github**

***React, TypeScript, Node.js, MongoDB, Prisma, Tailwind CSS***

- Developed an e-commerce application with JWT authentication, admin dashboard, and online payment integration.
- Implemented modular front-end components and structured backend APIs for easier feature extension.

**Tontine Management System — Full-Stack Business App** **Live project** Github

***React, TypeScript, Supabase, PostgreSQL, Node.js***

**Test Credentials :**
**email : test@njangitech.com**
**password: Test123456**

- Built a scalable management platform with dashboard workflows and role-based access for operational tracking.
- Added practical business-focused workflows for data visibility and day-to-day operations.

**AI Chatbot Interface — Front-End AI Product** **Live project** **Github**

***React, TypeScript, Tailwind CSS, Gemini API***

- Developed a chatbot interface with streaming responses and markdown rendering for better readability.
- Focused on smooth interaction flow and clean message presentation for user trust and clarity.
